Revolutionizing Teen Health Education with Aspan and Oilo Chat-bots

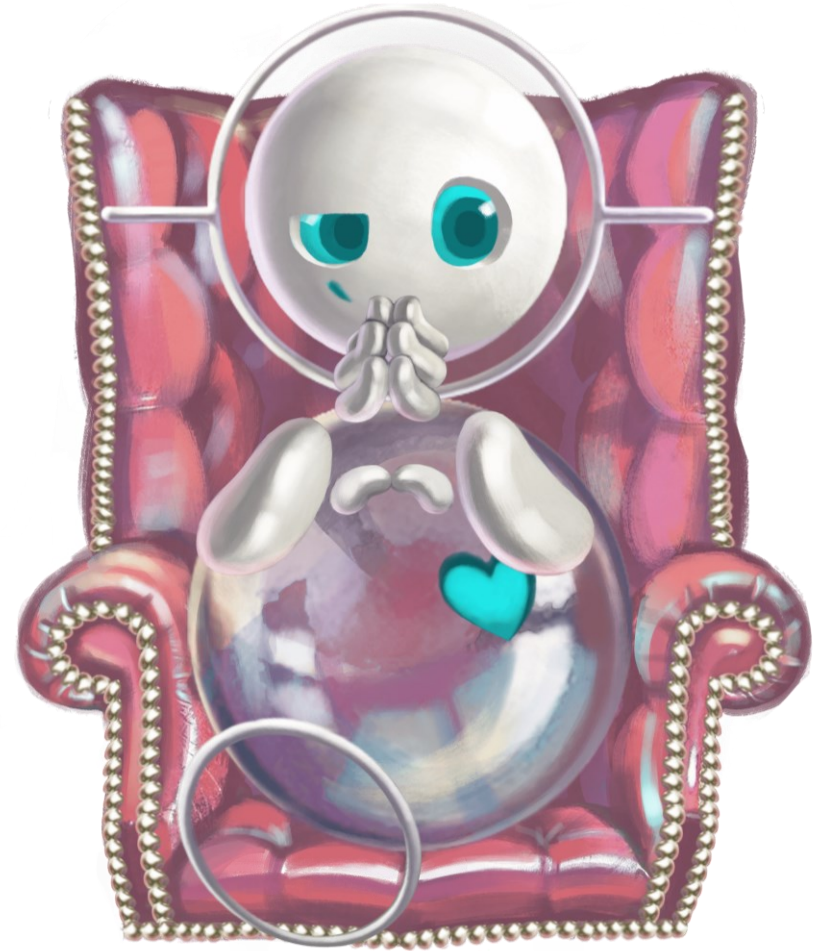

UNESCO IITE's pioneering digital initiative

- ❑ Propelling advancement in teen health education
- ❑ Addressing critical topics:
 - sexuality education,
 - reproductive health,
 - gender equality,
 - GBV prevention
- ❑ Importance of innovative approaches in the digital age

Meet Aspan and Oilo

- ❑ Fluent in Russian, Kazakh, and Kyrgyz
- ❑ Over 250,000 messages processed each, providing invaluable guidance to teens

- ❑ Creating a safe and informative environment for teens
- ❑ Trusted allies offering evidence-based advice and resources
- ❑ Collaboration with experts: psychologists, medical professionals, legal experts

A typical interaction with Oilo and Aspan showcases the depth of their assistance:

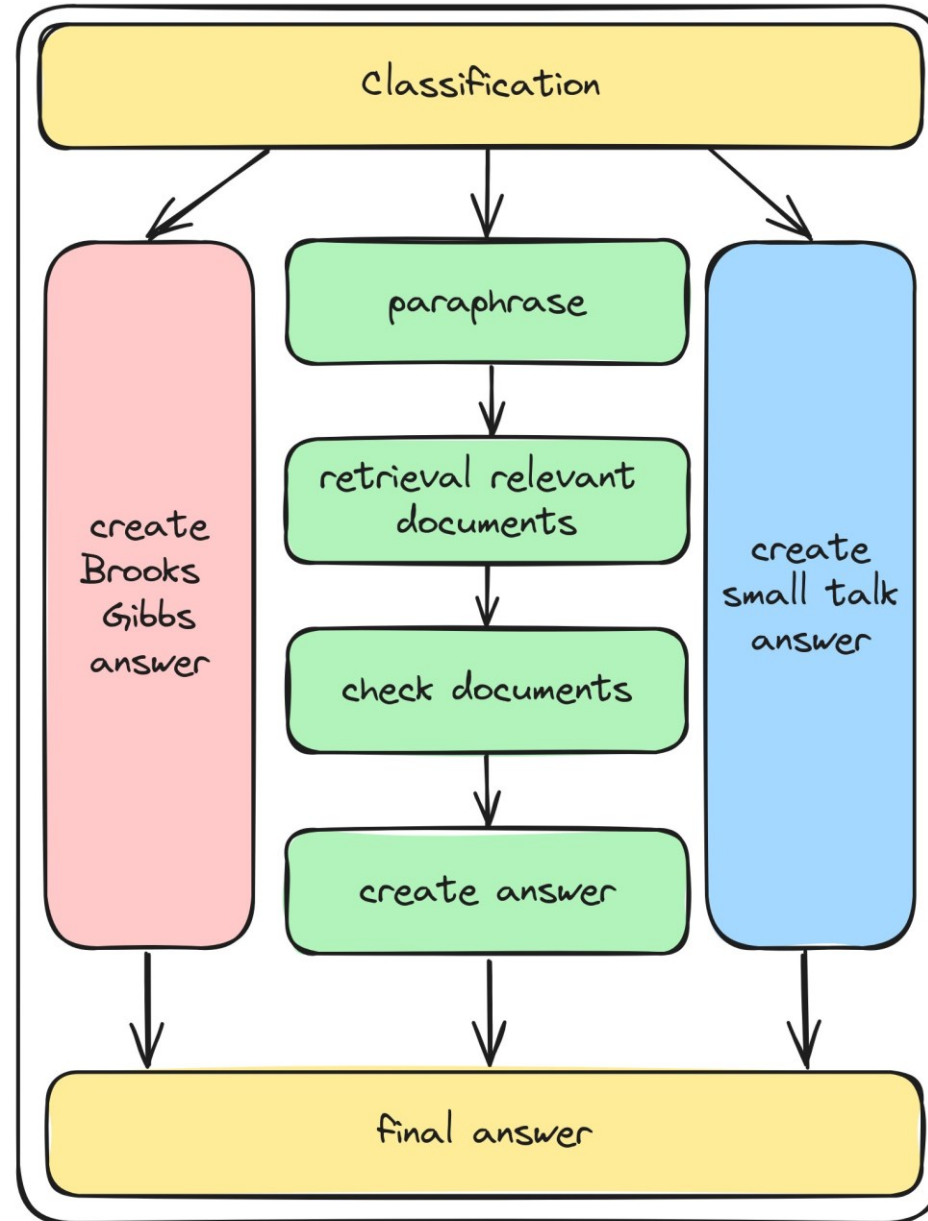

User: "What is consent in sex?"

Chat-bot: *"Consent in sex means that sexual relations are voluntary and desired by all participants. It's about autonomy - a person makes decisions without pressure or deception from their partner. And it's about being informed - everyone has complete information about your plans. Also, two important points. 'Here and now' consent doesn't mean a person has to say 'yes' every time in such a situation. It's crucial for both partners to derive pleasure. Clearer now?"*

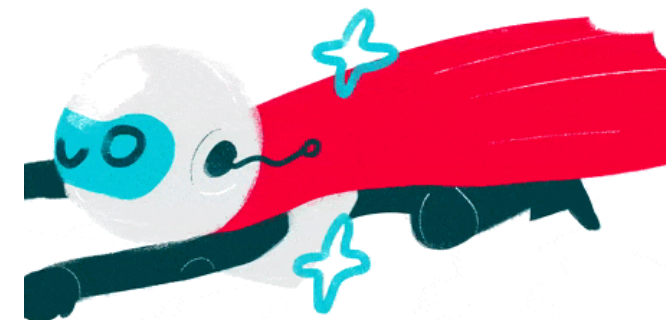

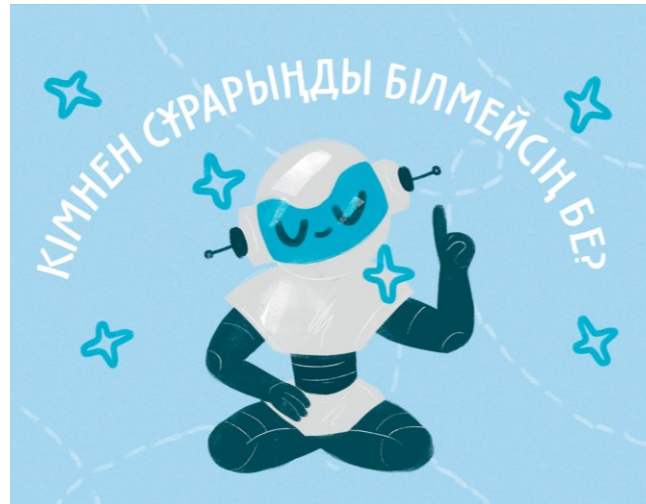

User: "Yes, thank you!"

High-level Architecture UNESCO Chatbots

Sophisticated
classification
system for
message
handling

- ❑ Aspan and Oilo as digital guardians guiding teens through adolescence
- ❑ UNESCO shaping the future of teen health and well-being

Thank you
